

# **“Oil Sponge” Testing Protocol**

June 21, 1994

Toxicity Characteristic Leaching Procedure (TCLP)

A sample of “Oil Sponge” sealed in a glass container was taken to McKenzie Laboratories for testing. The legal TPH for soil in the United States ranges from 50 – 100 ppm. The TPH for water the levels generally cannot exceed 5 ppm.

**“Oil Sponge” had a TPH level of .86 ppm**
